

HIGH EFFICIENCY BLOWER SYSTEM

UBP has designed this technologically advanced system with your bottom line in mind!

- Drastically reduce your operating expenses
- Increased functionality
- High efficiency with reliable, proven technology

ONBOARD CONTROL SYSTEM TURNKEY OPERATION

Operate independently or integrate with your plant computer for control.

- No separate control panel required
- Constant flow
- Variable Flow
- Diffused Oxygen Monitoring System (Requires probe)
- Control locally or remotely

**POSITIVE DISPLACEMENT,
NEVER WORRY ABOUT SURGE AGAIN!**

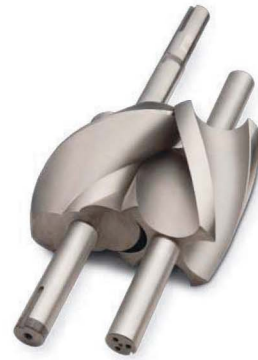

INCREASED FUNCTIONALITY WITH PROVEN RELIABILITY

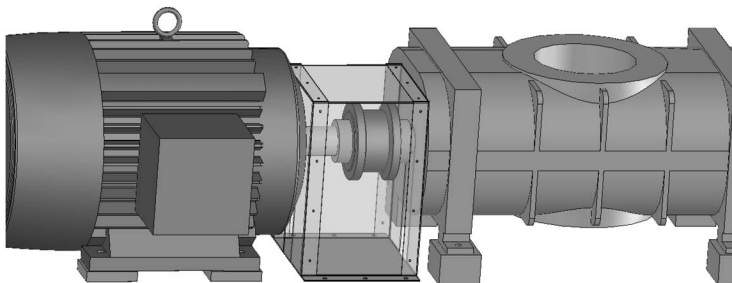

AXIALLY TWISTED ROTORS

- No drive losses
- Positive displacement compression allows for steady efficiency over entire operating range
- Highest efficiency
- Lower noise levels

LOW MAINTENANCE

- Direct coupling - No belt tightening or replacement
- Programmed maintenance schedule for oil change indication
- No hidden refit or rebuild cost
- Coupling drive eliminates power transfer losses
- Local service available throughout the United States

LOW NOISE

- High density acoustic foam
- Removable panels for easy maintenance

EASY INSTALLATION
PLUG AND PLAY

INDOOR OR OUTDOOR USE

- Powder coated aluminum and steel enclosure
- Durability in corrosive environments
